

# BAN410/510 Individual Lab 3

Create a new program which does the following:

When run, your program will display the following input screen asking the user to enter their first name, last name, and RED, BLUE, GREEN, or ALL:

Enter your First Name

Enter your Last Name

Enter RED, BLUE, GREEN, or ALL

If the user enters both of their names and RED, the output should show their name highlighted in red:

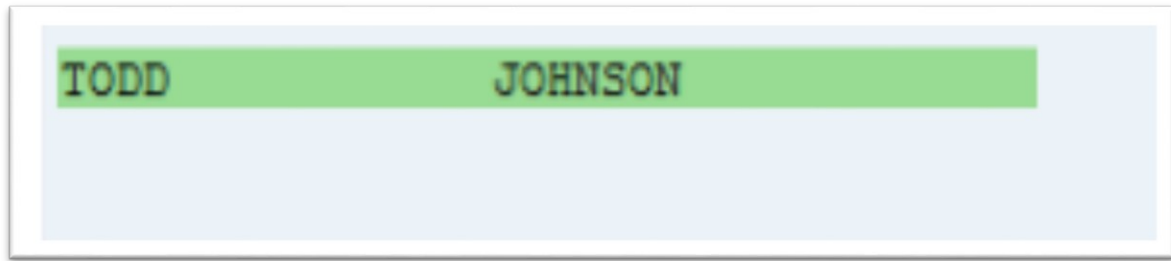

TODD JOHNSON

If the user enters both of their names and BLUE, the output should show their name highlighted in blue:

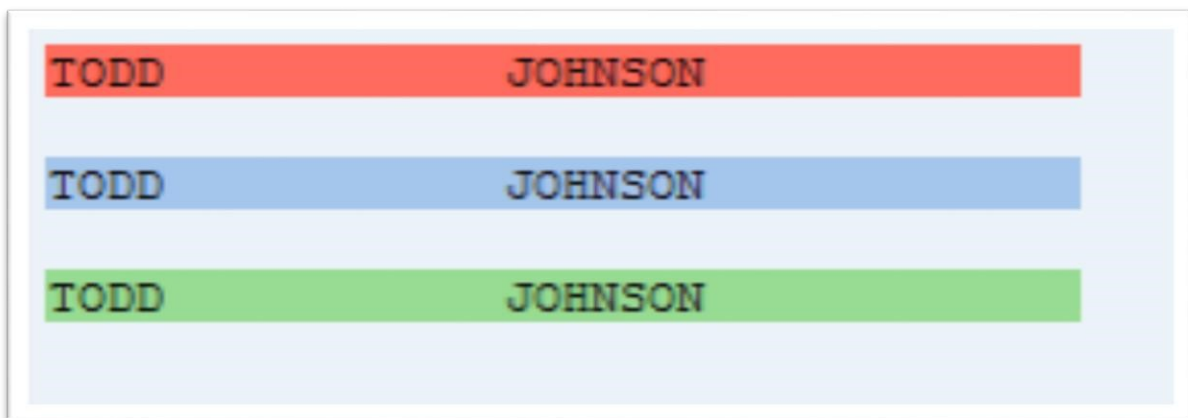

TODD JOHNSON

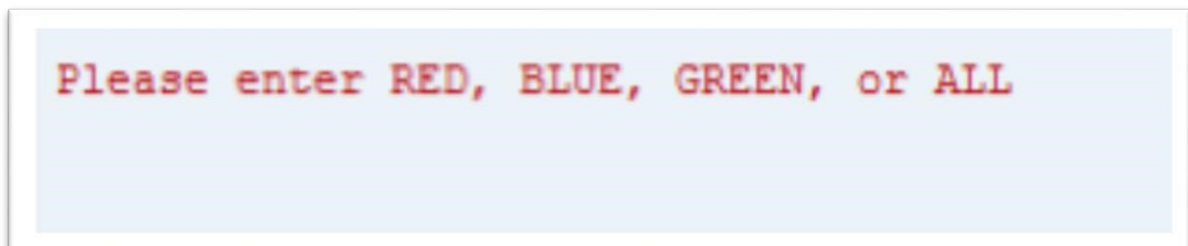

If the user enters both of their names and GREEN, the output should show their name highlighted in green:

If the user enters both of their names and ALL, the output should show their name highlighted in all three colors:

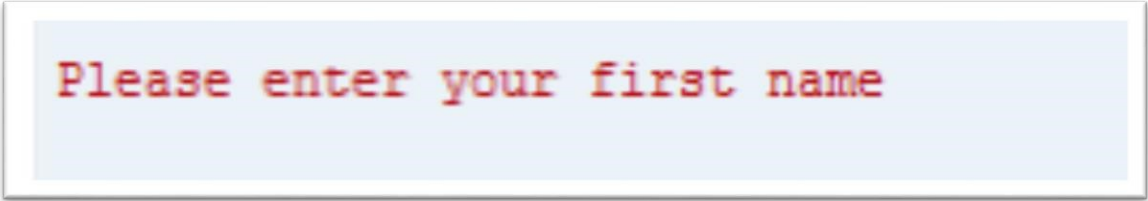

If the user enters both of their names and anything other than RED, BLUE, GREEN, or ALL, the output should show only the following error message:

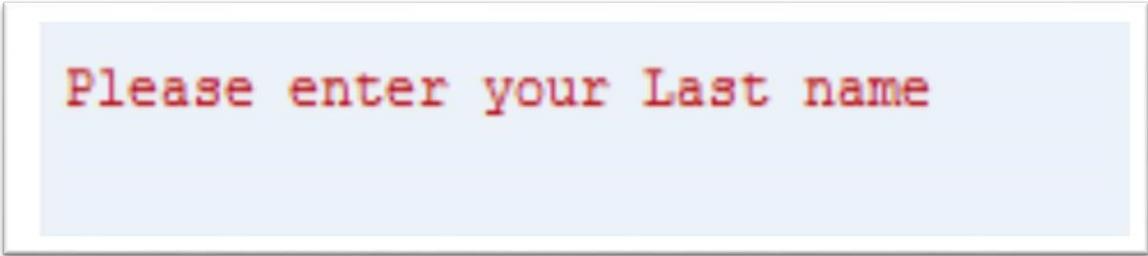

Now for the hard part...

If the user enters their last name, but leaves the first name box empty, the output should show only the following error message:

Please enter your first name

If the user enters their first name, but leaves the last name box empty, the output should show only the following error message:

Please enter your Last name

If the user leaves BOTH name boxes empty, the output should show only the following error message:

Please enter your First and Last names

When complete, please make sure your program is activated and submit a text version in BBLearn.
